Mohammad Abdullah PMP® · CFPS®

Business Development Manager — Fire Protection

Gas Suppression Systems · Fire Pumps (NFPA 20) · Fire Alarm & Detection · Consultative Technical Sales

Dammam, Eastern Province, Saudi Arabia | Eng-m-a@outlook.com | +966 53 876 6689 | linkedin.com/in/m-o-abdullah

PROFESSIONAL SUMMARY

Consultative fire protection sales engineer and business developer with 14 years of experience, 11 of them in Saudi Arabia, specialising in three core disciplines: **gas suppression systems** (clean agent, HPCO2, inert gas, aerosol and wet chemical), **fire pumps** (electric, diesel and jockey packages to NFPA 20) and **fire alarm & detection** (addressable, aspirating, gas and flame detection to NFPA 72). NFPA Certified Fire Protection Specialist (CFPS) who sells by diagnosing first — assessing the hazard, the occupancy and the governing code with the client, then engineering the system that fits, rather than pushing a product. SAR 200M+ in cumulative project value delivered across five roles for Aramco, SEC, EPC contractors, consultants and end users in the Oil & Gas, Petrochemical, Water & Power and Industrial sectors. Currently building the fire protection business line at M.H. Sherbiny from the ground up.

CONSULTATIVE SALES APPROACH

- **Discover the risk —** Site visits and stakeholder interviews with end users, consultants and contractors to understand the hazard, the asset at risk, operational constraints and the specification before any product is proposed.
- **Engineer the fit —** Translate the requirement into a compliant design basis — suppression agent and method, pump duty point and driver, detection technology and coverage — referenced to the applicable NFPA standard and Aramco / SEC / Civil Defense requirements.
- **Advise on options —** Compare technical options, OEM alternatives and lifecycle cost so the client and consultant can make an informed decision; value-engineer and substitute equivalent approved products when budget or delivery demands it.
- **Stay through delivery —** Remain the client's technical point of contact through submittals, consultant approvals, delivery, testing and commissioning — building the trust that drives repeat business.

CORE TECHNICAL EXPERTISE

Gas & Special-Hazard Suppression Clean agent (FM-200 / HFC-227ea, NOVEC 1230 / FK-5-1-12) and inert gas systems to NFPA 2001 · High-pressure CO2 total-flooding and local-application systems to NFPA 12 · Condensed aerosol (Stat-X) to NFPA 2010 · Wet chemical kitchen suppression to NFPA 17A · Agent selection by hazard and occupancy · Design concentration and agent quantity review · Detection, release and abort control integration · Protection of E-houses, control rooms, switchgear, data and telecom rooms, turbine enclosures and kitchens

Fire Pumps & Water Supply Electric, diesel and jockey fire pump packages to NFPA 20 · End-suction, horizontal split-case and vertical turbine configurations · UL/FM-listed pumps, drivers and controllers · Pump selection, sizing and curve analysis against system demand · Water supply testing and evaluation · Hydraulic calculation for water-based systems · Booster and VFD-driven pressure sets · Integration with sprinkler, standpipe, deluge and foam systems · Also: portable extinguishers and general pump packages (chilled water, submersible, dewatering)

Fire Alarm & Detection Addressable and conventional fire alarm systems to NFPA 72 · Smoke, heat, beam and aspirating (FAAST) detection · Gas (H2, H2S, combustible) and flame detection with SCADA integration · Suppression release panels · PA/GA and voice evacuation · Replacement and upgrade of legacy systems in live, operating facilities

Commercial Consultative & solution selling · Techno-commercial offers · Tender management · Consultant & EPC specification engagement · Key account management · Contract negotiation · Pricing strategy · Pipeline forecasting · CRM

OEM Access Suppression & detection: Kidde · Fike · Ansul · Siemens · Johnson Controls · Simplex · AutoCall · Honeywell · Hochiki · C-TEC · Edwards · Autronica · Stat-X · NAFFCO · NMFire. Sprinkler & foam: Viking · Reliable · HD Fire · Chemguard · National Foam. Fire pumps: A-C Fire Pump · Aurora · Peerless · Patterson · SPP · Xylem.

Also Industrial automation, SCADA, instrumentation and LV/MV power · SAP · Microsoft Dynamics · Odoo · Power BI · AutoCAD · English & Arabic · Transferable Iqama · Valid Saudi driving licence · Kingdom-wide travel

EXPERIENCE

Senior Sales Engineer — Fire Protection May 2026 – Present

M.H. Sherbiny — Dammam

- Recruited to establish the company's fire protection business line from a standing start — business plan, OEM partnerships, pricing and go-to-market for gas suppression, fire pumps, sprinkler systems and fire alarm.
- Lead with technical consultation: visit consultants, contractors, EPC firms and facility managers across the Eastern Province to assess hazards and specifications, then propose code-compliant suppression, pump and alarm solutions.
- Carry out product selection and design reviews to NFPA 2001, 12, 17A, 20 and 72, and prepare techno-commercial offers that explain the design basis, not just the price.

- Use established access across major suppression, detection and fire pump OEMs to offer clients genuine options and approved equivalents on tender.
- Own the full cycle — inquiry, technical pre-sales, tender submission, negotiation, order closure and project execution.

Sales Manager Oct 2024 – May 2026

Subway Networks — Dammam

- Opened a fire protection revenue stream — alongside BMS, CCTV, access control and public address — by consulting existing industrial clients on their life-safety gaps and introducing a personal client portfolio.
- Grew annual revenue by roughly 60% to the highest level in company history, and won the company's largest-ever project: a SAR 17M, 60 km medium-voltage cable contract at Hadeed (Saudi Iron & Steel Company).
- Led a 10-person team (7 inside, 3 outside sales engineers) delivering automation, SCADA, instrumentation and gas detection projects, including H2 and H2S detection integrated with Siemens SCADA.

Senior Sales Engineer — Fire Suppression & Life Safety Apr 2022 – Oct 2024

Johnson Controls Arabia — Khobar

- Sold FM-200 clean agent, wet chemical kitchen suppression and PA/GA systems to industrial, oil & gas and food-processing clients, matching each system to the client's hazard and operating conditions.
- Grew revenue by 180% and repeat business by 50% through a consultative account strategy built on technical presentations, demonstrations and long-term client relationships.
- Converted complex specifications into won business; negotiated contracts, set pricing strategy, managed the pipeline and forecast, and mentored junior sales engineers.

Project Sales Engineer — Fire Protection Aug 2018 – Apr 2022

Heba Fire & Safety Equipment Co. — Dammam

- Secured and managed over SAR 25M in turnkey fire protection projects — gas suppression, fire pumps, sprinkler and fire alarm — across Water & Power, Oil & Gas, Petrochemical and Industrial sectors, serving 100+ customers a year.
- Prepared technical proposals and bid packages for large-scale systems, including FM-200 and fire alarm for Aramco's Marjan E-houses, fire alarm replacements at Ras Tanura and the Jeddah Refinery, and fire pumps within turnkey scopes for seven Waad Al Shamaal pumping stations.
- Covered projects and O&M nationwide, advising clients on rectification, upgrades and code compliance.

Project Sales Engineer — Pumps & Power Aug 2015 – Aug 2018

Abunayyan Trading Corp. — Jeddah

- Sold centrifugal, submersible and dewatering pump packages across the Western Region, performing duty-point sizing, curve analysis and selection for each application.
- Supplied Kohler generators and ATS, busways and Diehl smart metering; produced client education webinars.

Technical Sales Engineer Oct 2012 – Aug 2015

Ayoubi Steel Factory — Amman

- Developed tailored steel solutions and technical proposals for industrial and infrastructure projects.

SELECTED FIRE PROTECTION PROJECTS

Gas Suppression E-houses FM-200 suppression and fire alarm — Marjan Oil Field (Aramco / KiCE) · FM-200 and fire alarm — SEC New Call Center, Makkah · FM-200 — Saudi Dairy & Foodstuff Company · Wet chemical systems — South Ghowar, Dammam and Hardh camps

Fire Alarm & Detection Fire alarm replacement — Ras Tanura and JT MTU Radar Room, Jeddah Refinery (Aramco) · KAPSARC Riyadh · Jubail desalination plants · FAAST aspirating detection turnkey system · H2 / H2S gas detection with SCADA integration (Aujan Coca-Cola, S-Chem) · PA/GA rectification (Saudi Kayan)

Fire Pumps & Water-Based Fire protection including fire pumps for seven pumping stations — Waad Al Shamaal · Fire protection replacement and upgrade — Jubail Energy Service Co. · Foam chambers — Aramco Abqaiq · VFD-driven booster pumps — Aramco Tanajib · Nine dewatering pumps — National Guard Housing, Thuwal

EDUCATION & CERTIFICATIONS

Certified Fire Protection Specialist (CFPS) — NFPA · 2024 – 2027 · ID 1131510-CFPS

Project Management Professional (PMP)® — PMI · 2021 – 2027

BSc, Mechatronics Engineering — Al-Balqa Applied University, Amman · 2008 – 2012

PROFESSIONAL MEMBERSHIPS

Saudi Council of Engineers — Professional Engineer · **Jordanian Association of Engineers** · **NFPA** — Member · **PMI** — Member

Appendix · Training & Project Portfolio

Mohammad Abdullah — supplementary detail to accompany the CV.

TECHNICAL & PROFESSIONAL TRAINING

- **3M (2018):** Clean Agent Fire Suppression; Clean Agent Fire Extinguishment.
- **FEMA (2018 – 2019):** Hydraulic Calculation for Water-Based Fire Protection Systems; Testing & Evaluation of Water Supplies for Fire Protection; Hazardous Materials for Inspectors.
- **Schneider Electric (2018):** Pumping Systems I–III; Active Energy Using Speed Control; Power Distribution I; Emergency Power Generators for Healthcare Facilities; Alternative Power Generation Technologies; Demand Response & the Smart Grid.
- **Siemens (2025):** Protection Systems in Low-Voltage Power Distribution; Protection Concept; 3WA Air Circuit Breakers; 3VA Molded-Case Circuit Breakers; Basic Principles of Electrical Engineering.
- **Kohler Power Systems (2017):** Industrial Power Systems Fundamentals; Marine Power Systems; Power QuickPack; Power Resource Center.
- **LinkedIn Learning (2020):** Selling to Executives; Managing Project Stakeholders; Project Management Foundations.
- **Early career:** SolidWorks, Jordanian Association of Engineers (2011); Embedded Systems Design, Jordanian Ministry of Industry (2010).

FIRE PROTECTION PROJECT PORTFOLIO

Heba Fire & Safety Equipment Co.

- E-houses fire alarm and FM-200 suppression — Marjan Oil Field Development (end user Aramco; main contractor KiCE).
- Fire alarm system supply and installation — JT MTU Radar Room, Aramco Jeddah Refinery.
- Fire alarm system replacement — Ras Tanura, Aramco.
- Fire alarm system — KAPSARC Riyadh (Hi-Tech & Saudi Aramco).
- Fire alarm and FM-200 suppression — Saudi Electricity Company New Call Center, Makkah.
- Fire protection systems for seven pumping stations — Waad Al Shamaal.
- Foam chambers — Aramco Abqaiq.
- Replacement of fire alarm systems — Jubail desalination plants.
- ARASCO DPS and DFM — maintenance and rectification of fire alarm, firefighting and suppression systems.
- Fire protection systems — Port Control Center, Jazan; Jordan Al-Watan Precast Panel Factory, Jubail.
- Fire protection — GTG load compartment, Mafriq; Tri-Sponge Plant, Yanbu; Al Kifah batching plant; FAAST turnkey system; Apex Pharma, KAEC.

Johnson Controls Arabia

- Fire protection systems replacement and upgrade — Jubail Energy Service Co.
- FM-200 fire suppression system — Saudi Dairy & Foodstuff Company.
- Wet chemical fire-extinguishing systems — South Ghowar, Dammam and Hardh camps.
- Rectification and maintenance of the PA/GA system — Saudi Kayan.

DETECTION, PUMPS, AUTOMATION & POWER PROJECTS

Subway Networks

- Design, supply, installation, testing & commissioning of an H2 gas detection system — Aujan Coca-Cola Beverages.
- Addition of H2S sensors and integration into an existing Siemens SCADA system.
- VFDs for booster pumps — Aramco, Tanajib.
- Revamp, replacement, testing & commissioning of 60 km of MV cables for six feeders; cable tray replacement; crane motion control and servo drives — Hadeed.
- Flow metering and integration with Siemens PCS7 DCS for the Abqaiq water pipelines — Aramco.
- SEC under-frequency relay integration to common EAF PLC with cable-laying works — Saudi Electricity Company.
- Rectification and installation of medium-voltage circuit breakers — SIPCHEM.
- Automation and SCADA system (OT Labs Phase 1) — University of Prince Mugrin, Al Madinah.
- PLC/HMI development and analyzer-shelter integration — S-Chem; wastewater flow meters — Alsafi Danone; AHU VFD — JCI.
- Truck-loading control upgrades — Arabian Cement, ODS Saudi Company; assembly-line, servo and MCC panel projects for industrial and sewage-treatment clients.

Abunayyan Trading Corp.

- Nine dewatering pumps — National Guard Housing, Thuwal; generator, busway and smart-metering solutions across the Western Region (Kohler, Schneider Electric, Diehl).
